

A detailed botanical illustration in a light orange-brown hue. The central focus is a branch of a plant with several large, ovate leaves that have serrated margins and prominent pinnate venation. Several flowers are shown in various stages of bloom, with five petals and a central cluster of stamens. At the bottom of the illustration, there are two circular slices of citrus fruit, likely lemons or oranges, showing their internal segments and seeds. The word "ZAGARA" is printed in a bold, serif font across the middle of the branch.

# ZAGARA

# ZAGARA

La parola deriva dai termini arabi zahara “splendere, sfavillare di bianco” e zahr “fiore”. Per zagara si intende in particolare il fiore dell’arancio e del limone. Il fiore di zagara viene utilizzato per la preparazione dei profumi, dei dolci e infusi.

*The word “Zagara” from the Arabian, means orange blossom and is the fragrant flower of the Citrus sinensis. It is used in perfume making, desserts and teas. The petals of orange blossom can also be made into the delicately scented orange flower water.*
